2793/3

METHOD AND APPARATUS FOR DISPLAYING A KEY PAD ARRANGEMENT ON A SELECTIVE CALL RECEIVER

Abstract of the Disclosure

5

10

15

A selective call receiver (5) comprises receiver circuitry (14) for receiving a message, a display (22) for displaying a key pad arrangement (70) and for displaying the received message in a message display area (68). A microcomputer (20) and user controls (12) interact with the key pad arrangement (70) to modify the received message. A method of displaying the received message comprises the steps of displaying the key pad arrangement (70) and interacting with the key pad arrangement (70) so as to modify the message or add a new message.
